

EMI Scan

SmartScan EMI-350/550

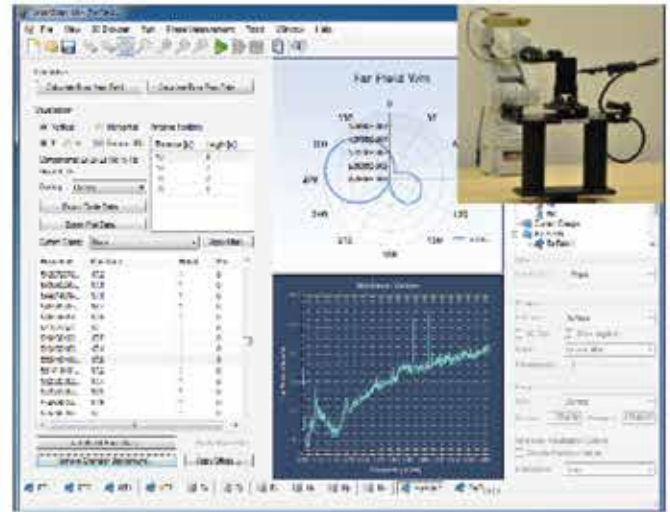

- Wide range of probe selection (lower than 100kHz to higher than 40GHz)
- Non-metallic scan plate and robots from Mitsubishi
- Reliable, intuitive and user friendly SW
- Full list of SA driver support

NFFF Transformation

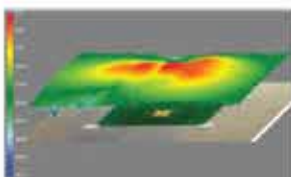

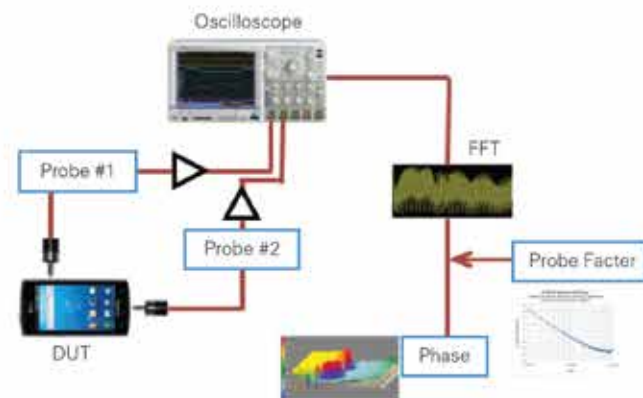

SmartScan-RE

- Specific application of the phase measurement technology
- Chamber measurement condition control
- Cable RE and 3D FF available
- Suspected frequency list

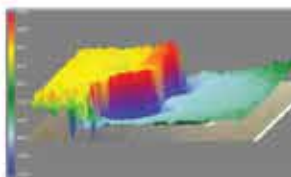

Phase Measurement

- Automated wide band phase measurement

320MHz, Ex, Amplitude

320MHz, Ex, Phase

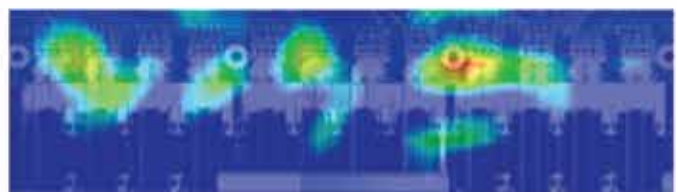

Emission Source Microscopy (ESM)

SmartScan-ESM

- Application of SAR (Synthetic Aperture Radar) technology to EMC
- FF source identification and FF estimation (above 5GHz)

10.3125GHz as scanned

10.3125GHz after processing
