

ESD Scan

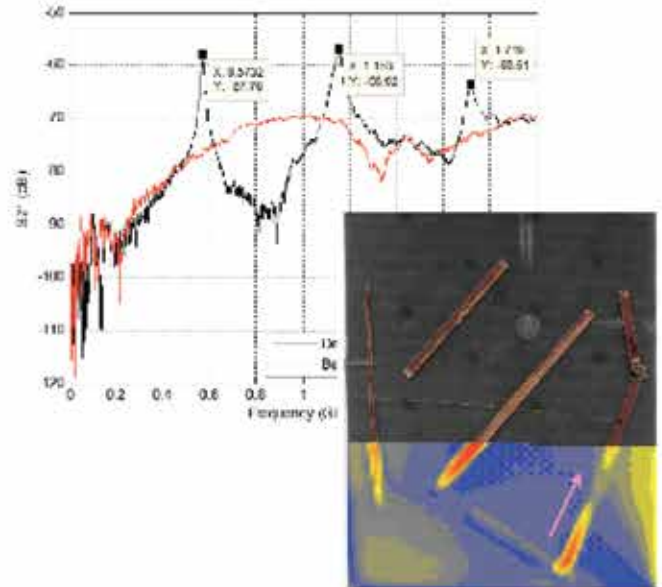

SmartScan ESD-350/550

- Generation of susceptibility map (reproduces gun test failures)
- Up to 8kV TLP (tr<300 ps)
- Automatic failure detection

Resonance Scan

- Identifies resonance structures and resonating frequencies
- Single probe for disturbance and reaction measurement

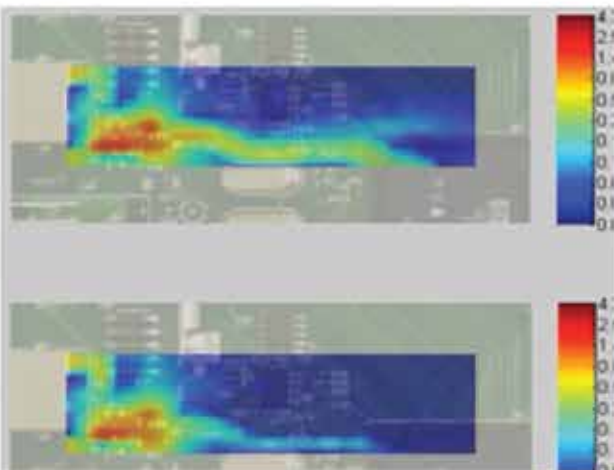

RF Immunity Scan

- Control of RF power and frequency
- Generation of susceptibility map

Current Spreading Scan

- Visualizes current flowing

Robotic ESD Gun Tester

SmartZap

- Fully automated ESD gun tester with automatic failure detection capability
